

## INSTRUCTIONS LOADING GRAPHICS PRINTING AREA

- 1 DOWNLOAD THE TEMPLATE
- 2 ENTER YOUR GRAPHIC ON THE TEMPLATE

### PREPARATION OF THE GRAPHICS

Download the PDF file of your template, if not available we will send it by mail, and open it with any program

**If you open the template with Illustrator:**

- keep document size unchanged.
- do not move the template.
- work on a new layer

**Convert Fonts into template**

- do not change the three colors used for the template
- save document in PDF format with page size

**If you are using Photoshop® or a similar program:**

- import the template and set to 300 Dpi, CMYK color space, while maintaining the same size as the document.
- place label graphics and template on separate layers.

**Set up the graphics in the printing area:**

- minimum height of the writing needs to be 1 mm
- you can utilize only one screen printing color
- do not insert images, you can use only logos and/ or vector pattern

### SAVE THE FILES TO SEND TO US

We suggest you to generate the files for the printing in one of the follow formats

**- PDF (versions 4-5-6)**

**Creating PDF file:**

- Use CMYK color space and 300 Dpi resolution images.
- **convert Fonts into template.**
- disable any file compression,
- if you save the PDF by using programmers such as Office, colors may undergo changes because of the RGB color space.

**Macintosh or PC? There is no difference in creating PDF files.**

### HOW TO DO A CORRECT GRAPHIC PRINTING AREA

#### CIRCULAR BOTTLES/JAR

Measure in cm

L = width  
H = height

#### RECTANGULAR BOTTLES

FRONT

BACK
